Who We Are

Client Savvy works with professional services firms to design, implement and measure client experience programs to improve business relationships. We have a mature SaaS application for collecting feedback; we are looking for a .NET Developer to join our agile product team in maintaining the existing Client Feedback Tool and help us as our software evolves to improve performance and user experience. We're dedicated to improving our software to be as intuitive, automated, and resilient as possible while collaborating across the globe.

Who You Are

As a developer, you will deliver, implement, and administer technology solutions that enable our clients to achieve their client experience goals. You enjoy the opportunity to be a technical advocate to influence and develop a strategic SaaS application with .NET frameworks. Equipped with a growth mindset, you enjoy learning the latest technology trends with a passion for building responsive web applications and API enabled architecture. In the spirit of agile, you like to do what works, try new things, and stop doing things that don't work.

Primary Duties & Responsibilities

- Develop, test, deploy, maintain and improve software assets
- Deliver efficient, maintainable, reusable code with attention to detail
- Actively participate in solution design to analyze, research, and resolve issues
- Create automated test scripts
- Participate in code review
- Balance business needs with a solid commitment to quality, performance, and support
- Work closely with an agile team of product owner, designer, developers, and QA
- Provide proactive, constructive feedback to team members

Education & Skills

- English communication skills, verbal and written
- 4+ years of professional software development experience with these preferred technologies:
  - C# and ASP.NET application framework(s), ideally .NET Webforms and Core
  - SQL, LINQ, Entity framework
  - Extensive SQL Server knowledge
  - Building, maintaining, and consuming APIs with REST and JSON
  - Unit testing libraries
  - Version control, preferably SVN
  - Agile/Scrum software development process
- Familiarity with DevOps, continuous delivery, configuration management/tools desired
- Ambition to learn and use emerging technologies to improve our software

Start date: April 1, 2021 | To apply, please send your CV to **support@clientsavvy.com**
